DETAILED ACTION

Information Disclosure Statement

It is unclear what patent the 410,289 reference was intended to be, since the name and date do not correspond with that patent number. It has not been considered. Also note that a change was made on the IDS to the date for U.S. Patent 5,152,508.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Clapp et al. (U.S. Patent 42,166).

Clapp et al. discloses a plurality of barrier sections removably coupled together (Figure 1) by a plurality of hinge members (B) and a plurality of rods (C) as claimed.

Regarding claims 3 and 4, the lower ends of the rods are pointed and extend into a ground surface (Figure 1).

Regarding claim 5, the rod could be grasped by a hand, thereby meeting claim recitations.

Claims 1, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Mouri (U.S. Patent 6,257,559).

Art Unit: 3671

Mouri discloses a plurality of barrier sections removably coupled together (Figure 4) by a plurality of hinge members (3) and a plurality of rods (14) as claimed.

There are pivotably coupled foot members (2).

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 is allowed.
